

Global Security and Innovative Strategies (GSIS) is a security consulting and strategic advisory firm headquartered in Washington, DC. We leverage our national security, public sector and international expertise to provide comprehensive solutions for our clients.

## WHO WE ARE

The experience of the GSIS Principals, Senior Advisors and Directors provide the foundation for the work we do. Our expertise in public safety, national security and executive management enable us to deliver innovative and strategic solutions to a diverse range of clients that include leaders of Fortune 500 companies, nonprofit institutions, universities and state and local governments.

## WHAT WE DO

GSIS leverages its national security, public sector and international expertise to provide comprehensive solutions for its clients. These solutions include market entrance, branding, strategic planning, government relations, special interest groups, cyber threat intelligence, risk assessments and response services, subject matter expert support and much more.

1401 H Street NW, Suite 875 | Washington, D.C. 20005 | 202-888-2360

## STRATEGIC ADVISORY

GSIS' broad network provides unique access to international and domestic markets. We offer clients services to enhance business operations including market entrance, crisis management, continuity planning and implementation, data solutions and business intelligence.

## LITIGATION SUPPORT SERVICES

GSIS assists public and private sector clients with a full suite of litigation support. These services include thought leadership on navigating state and local legislation, capturing potential funding resources and providing assistance with strategic engagement at all levels of government.

## CYBERSECURITY

GSIS cybersecurity provides a full range of cyber risk, incident response and training services. We work with organizations to identify threat origins, gather intelligence, protect sensitive information, manage brands and reputations and monitor emerging threat trends. Utilizing work class expertise, we help our clients prevent, anticipate and respond to cyber threats.
